

Three Common Challenges that Lean Portfolio Management Solves

Speaker: Deema Dajani

Session Abstract:

Portfolio management is not new, organizations have always had a way to prioritize, budget, and govern investments. Lean Portfolio Management (LPM), on the other hand, is a model that was evolved in SAFe(c) as one of the seven core competencies of the Lean Enterprise. Deema will share trends in the field, and three common challenges and how LPM addresses them: strategy disconnect, overload, and lack of visibility to portfolio performance.

Deema Dajani, Transformation Advisor and SPCT at Scaled Agile

Draws on a Startup background and an MBA from Kellogg to help large established institutions create the environment to shape disruption with business agility. Starting her Agile journey in the early 2000's, she played various roles from Product Manager, Director of Strategy, to pre-IPO turn around leader. Deema transitioned to advisory where she led some of the largest transformations to business agility and lean portfolio management in the Financial Services and Insurance space.
