Design Thinking begins with Empathy

“How do we develop agency in our leaders and our people to sense the circumstance, reflect, learn, figure out what the right thing to do is, consider trade-offs, and then create action to move all of us closer to the goal?”

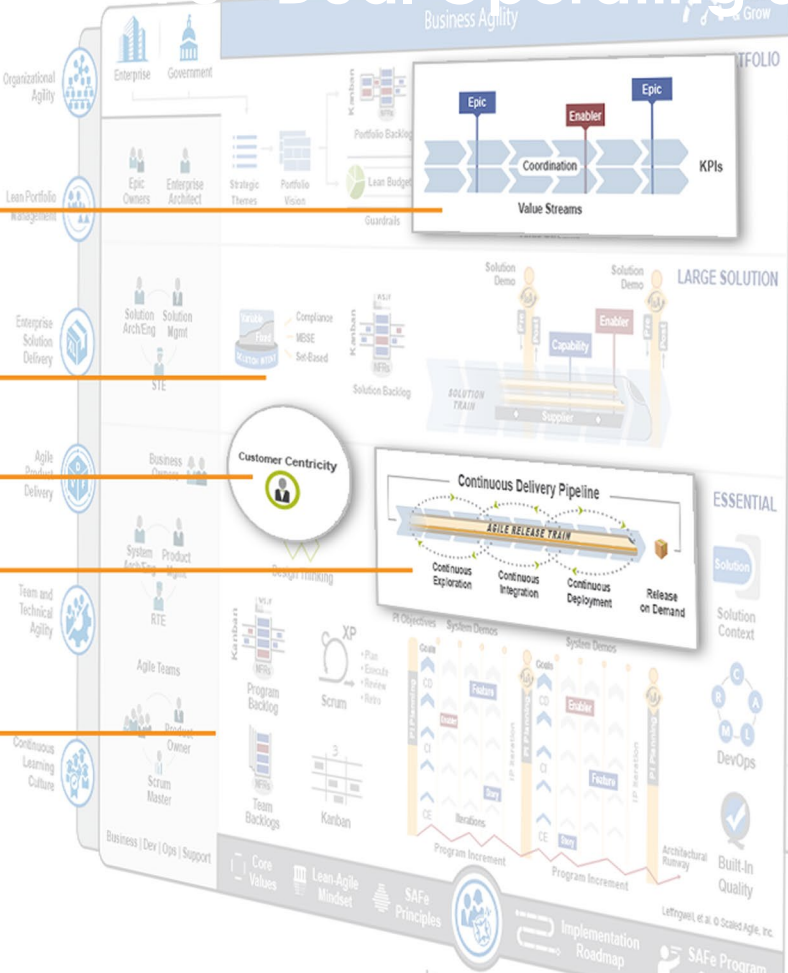

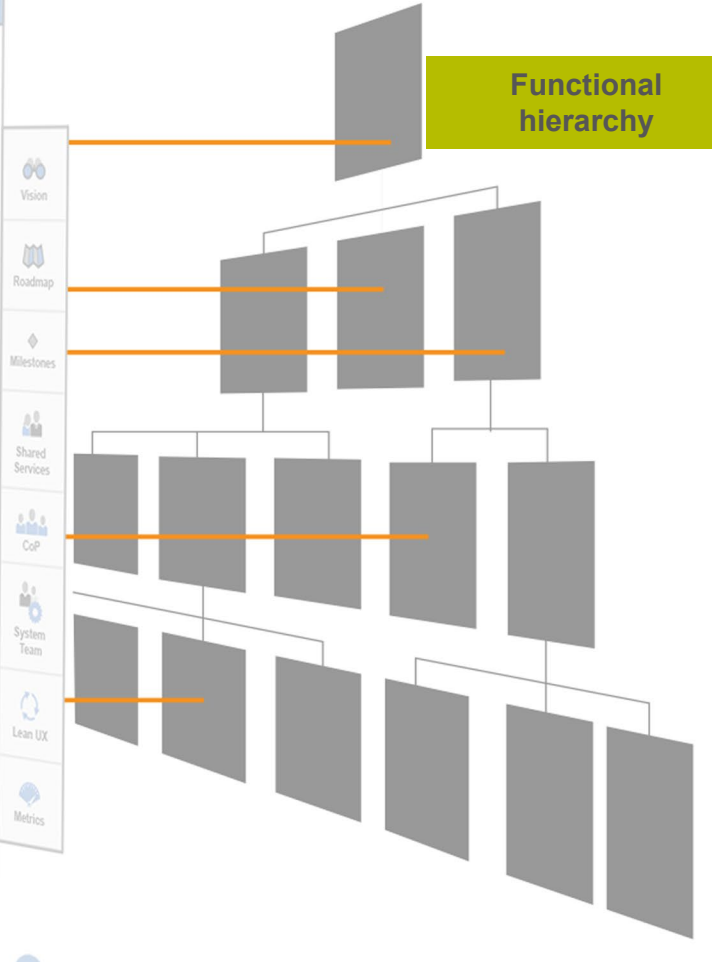

1. Orderly progression of values
2. Values are associated with a given social structure

How do you grow this empathetic fabric?

SAFe® Lean-Agile Principles

#1 Take an economic view

#2 Apply systems thinking

#3 Assume variability; preserve options

#4 Build incrementally with fast, integrated learning cycles

#5 Base milestones on objective evaluation of working systems

#6 Visualize and limit WIP, reduce batch sizes, and manage queue lengths

#7 Apply cadence, synchronize with cross-domain planning

#8 Unlock the intrinsic motivation of knowledge workers

#9 Decentralize decision-making

#10 Organize around value

“For too long, the economy has been viewed as separate from ecology, but nature has showed us that the two are inextricably joined. In fact, the economy is a subset of the ecology. Every single thing – food, clothing, electronics, homes and office buildings, cars and the fuel to run them... – is made from resources that come from the earth”
